Eram Perwez

Software Engineer   ☎ 91-6290866465   📍 Kolkata-Rishra,Hooghly   ✉ eramperwez334@gmail.com   in LinkedIn

PROFILE

I am an analytical, professional and goal-driven software engineering, with an aptitude for object-oriented and design programming. I have a strong foundation in programming principles across several platforms and self-learned abilities for quickly mastering new technologies. I am seeking an opportunity to develop as a programmer.

EDUCAITON

Information Technology in ITI
Banipur Women ITI   📅 2017 - 2019   📍 Habra

Major in Software and Information Technology. GPA: 84.6%

EXPERIENCE

Full Stack Web Developer

- Designed, architected and wrote the front- and back-end of eCommerce web application using PHP, JavaScript and MySQL.
- Effectively transformed client's vision into application designs and systems requirements.
- Worked collaboratively with the client to provide rapid, client acclaimed full-stack web development, which optimizes user experience and search engine ranking.

ACADEMIC PROJECTS

- **Module 1 (Computer Hardware and Maintenance)**
  - Detecting the defects in the different components of Motherboard to ensure smooth execution of Desktop & Laptop.
- **Module 2 (Computer Networking)**
  - A project on packet analyzer & sniffer using Wireshark. It is used for network troubleshooting, analysis, software and communications protocol development.
- **Module 3 & Module 4 (Web Designing & Development)**
  - A project on Employee Management System to automate the day-to-day manual activity of employees on system based so that it will be easy for organization to manage their employees efficiently and effectively.
- **Module 5 (Business Data Analytics)**
  - Data Analysis is performed on dataset using Power BI Business Intelligence Tools.
  - Created an Object Detection Model Using Google Teachable Machine.
- **Elective Module1 & Elective Module 2(Cloud Application and Enterprise Developer)**
  - Build my own website using HTML, CSS, Bootstrap, Node Js, MongoDB (Atlas Cloud Based) and deployed it to IBM Cloud using Cloud Foundry Services.

SKILLS

Languages
Java | WordPress | Python | PHP | JavaScript HTML/CSS |

Machine Learning/Artificial Intelligence
Neural Networks | Computer Vision

Technologies & Others
Git | MySQL | SQL | MongoDB | JSON jQuery | AJAX | RESTful API

Successfully Completed Courses
Data Structures
Object Oriented Design & Analysis of Algorithms
Integrative Software Engineering.

Personal Skills
Fast learner
Self-motivated
Dedicated team member
Excellent communication skills
Strong analytical abilities
Goal-oriented team leader
